The New Immigrants Reteaching Activity

Chapter 7: Section 1: The New Immigrants Reteaching Activity

1. The continental crust is thicker and contains less iron than the oceanic crust.
2. By studying rock that erupts from the mantle, scientists can determine the age and origin of the basement rocks of the continent.
3. The crust, mantle, and core are the three major layers of the Earth.
4. The upper, rigid layer of the Earth is called the crust.
5. Scientists use various methods to study the Earth's interior, such as seismology and drilling.

Reteaching Activity:

- Review the key terms from the chapter.
- Create a timeline of the major events leading to the immigration of new individuals to the United States.
- Discuss the reasons for immigration and the challenges faced by immigrants.
- Use a graphic organizer to compare and contrast the experiences of different immigrant groups.
- Conduct an activity where students act out a scene from the immigrant experience, such as a coffee shop or a classroom.

Additional Resources:

- Chapter 7 Supplemental Activities
- Online resources and interactive activities for Chapter 7
- Chapter 7 Review Sheet
- Chapter 7 Quiz

Assessment:

- Chapter 7 Test
- TAKS Practice Test
- Benchmark Assessment
